Objective

A responsible and motivated student eager to apply academic knowledge in the workplace. Currently completing a Master's in Computer Applications and holding a Bachelor's in Information Technology, I am enthusiastic about contributing to innovative projects in a dynamic role. I leverage programming, software engineering, and problem-solving skills to deliver high-quality, user-centric software solutions.

Education

Vivekanand Education Society's Institute of Technology

2023 - 2025

Master of Computer Applications

81.66

SK College of Commerce and Science

2019 - 2022

BSc. Information Technology

74.94 %

Skills

Programming Languages : C, C#, JAVASCRIPT, HTML, CSS, Python, Java.

Frameworks & Technologies: ReactJs, NodeJs, Angular.

Database: SQL Server, MYSQL, NoSQL.

Designing Tools: Figma, Android Studios, Canva, AWS.

Strong Presentation Skills. Communication Skills.

Projects

Inventory Management App

- Developed a comprehensive inventory management system for local businesses.
- Utilized machine learning to predict customer behavior and optimize operations.
- Key features included real-time tracking, demand forecasting, and customer analysis.
- Integrated SQL database for efficient data management.

Hostel Management Systems

- Created a web-based solution to streamline university hostel management.
- Implemented HTML, CSS, and JavaScript for the frontend, with SQL as the database.
- Addressed challenges in accommodation management and reduced administrative workload.

Quick Invoicer

- Designed a mobile app to simplify the invoicing process for businesses.
- Developed using Java and Android Studio, with MySQL for data storage.
- Enhanced billing accuracy, efficiency, and reduced manual errors.

Certificates

- Data Structure And Algorithms using Java NPTEL
- Database Management System NPTEL
- Introduction to SQL Simplilearn
- HTML, CSS and Javascript for Web Devlopers Couresera.
